## Monthly Commentary

As at December 31, 2023, the net asset value of BMO PG Fund decreased from the previous month (-0.69% net performance of Series F - CAD), resulting in a performance since inception of +0.41%. The performance of the fund was muted over the quarter as positive revaluation in Private Infrastructure holdings was offset by mark-downs in several underperforming Private Equity and Real Estate assets. The Real Estate portfolio experienced a write down due to market headwinds exacerbated by interest rates. In addition, foreign exchange effect created further pressure on CAD share class performance.

Among contributors to performance are:

Project Bonhomme II, which represents Partners Group's largest secondary portfolio acquisition, comprising 52 fund interests and 16 co-investments (the latter on a no-fee, no-carry basis), with exposure to some 300 underlying assets from high quality managers, including Brookfield, Silver Lake, Genstar and Blackstone. Transacted at an attractive 10% discount to reference NAV, the Project Bonhomme II portfolio is highly diversified, with no single asset accounting for more than 5% of the full portfolio NAV. Furthermore, Partners Group enjoys significant investment overlap with the portfolio assets (>70%), which allowed for in-depth insights during due diligence and at bidding stage. We continue to focus on high quality, inflection portfolios instead of highly discounted, low-quality assets which prioritize near-term gain.

PCI Pharma: The valuation of PCI Pharma Services, a global provider of outsourced pharmaceutical services based in the US, increased on the back of its continued robust financial performance. For the twelve months ending 31 October 2023, the company recorded double-digit growth in both revenue and EBITDA mainly driven by continued organic growth across all segments including its injectable business, Lyophilization Services of New England (LSNE).
