Monthly Commentary

As at 31 March 2024, the net asset value of BMO PG Fund increased from the previous month (+1.53% net performance of Series F – CAD), resulting in a performance since inception of +2.91%.

The net asset value of the fund increased in March, led by strong performance of the private equity portfolio. The largest contributor was SRS Distribution (SRS), one of the largest distributors of roofing, landscaping and pool supply products in the US. SRS announced that it has entered into a definitive agreement to be acquired by The Home Depot for an enterprise value of USD 18.25 billion, resulting in a 30% increase from the most recent valuation. The transaction is still subject to regulatory approvals and other customary closing conditions. This accretive outcome showcases the attractiveness of the Fund's mature portfolio of high-quality companies, compounding at double digit growth rates - several of which are expected to be exited in the near term.

Another strong performing investment was DiversiTech, a manufacturer of components and supplies for the US residential heating, ventilation, and air conditioning market. The positive revaluation mainly reflects its financial performance and an increased valuation multiple. DiversiTech's financial performance has benefitted from lower raw material and freight costs, alongside productivity gains from automation, which have partly offset discounting by competitors in some product categories.

Over the reporting month, Partners Group completed its acquisition of ROSEN Group, a global provider of recurring, regulatory-driven inspection and integrity management services for energy transmission pipelines. Founded in 1981 and headquartered in Switzerland, ROSEN's core business involves the sending of high-tech, precision sensors through pipelines to detect corrosion or minor cracks, helping asset operators deliver on ESG commitments and comply with tightening regulations, while maximizing pipeline output and longevity. A key component of the business plan is the continued rollout of advanced diagnostics, as well as other value creation levers such as sales force and go-to-market optimization, and continued investment in technological innovation, R&D, and capital expenditure. As part of the transaction, the company's founder, Hermann Rosen, retains a significant minority stake and a seat on the board of directors.
