Investing With BMO's Asset Allocation ETFs

Asset Allocation ETFs: An important decision, simplified

- **BMO Conservative ETF** (ZCON)
- **BMO Balanced ETF** (ZBAL)
- **BMO Balanced ETF** (ZBAL.T)
- **BMO Growth ETF** (ZGRO)
- **NEW! BMO Growth ETF** (ZGRO.T)
- BMO All-Equity ETF (ZEQT)
- **BMO Monthly Income ETF** (ZMI)
- BMO Monthly Income ETF (ZMI.U)
- BMO Balanced ESG ETF (ZESG)

66 Asset allocation explains over 90 per cent of the 99 variation in a portfolio's quarterly returns

1986 study by Brinson, Hood, and Beebower, "Determinants of Portfolio Performance"

8 Reasons to Buy Asset Allocation ETFS

- **1. Simplified Investing –** All-in-one Investment Solution that provides instant diversification
- 2. Broad diversification Consisting of a basket of ETF that in themselves hold many securities
- **3. Professionally constructed –** Leverage the Asset Allocation experience of industry professionals
- **4. Automatic Rebalancing –** Keeps one's investment portfolio on track to risk and return objectives
- **5. Transparency –** Knowing what is in the ETF can help reduce duplication when complementing a portfolio
- **6. Liquid -** Able to buy or sell the basket of holdings at any time
- 7. Lower cost ETF based solutions tend to charge lower fees than other diversified investments
- **8. All-in-one cost structure –** Most popular Asset Allocation ETFs only charge the one top fee without charging the underlying ETF costs

Why Does the Mix Matter?

A portfolio's asset allocation may have a large impact on an investor's long-term returns.

The decision between a conservative, balanced, growth and all-equity portfolio reflects an investor's risk/return profile. An investor must define their return objectives and determine their ability and willingness to accept market risk. An investor must consider factors such as time horizon and investment goals. A longer investing time horizon allows for more allocation to riskier assets such as equities, this is because an investor has more time to recover from short-term corrections. Each investing goal has its own unique asset allocation. Saving for a house, retirement or for education would each have its own optimal asset mix.

BMO's Asset Allocation ETFs: Methodology and Construction

BMO offers eight asset allocation ETFs where investors can access their optimal asset allocation:

- **BMO Conservative ETF** (ZCON)
- **BMO Balanced ETF** (ZBAL)
- **BMO Balanced ETF** (ZBAL.T) 6% distribution*
- **BMO Growth ETF** (ZGRO)
- **NEW! BMO Growth ETF** (ZGRO.T) 6% annual distribution paid monthly*
- **BMO All-Equity ETF** (ZEQT)
- **BMO Monthly Income ETF** (ZMI)
- **BMO Monthly Income ETF** (ZMI.U) *U.S currency*
- BMO Balanced ESG ETF (ZESG)

Market movements impact the asset allocation and cause it to shift over time. BMO's Asset Allocation ETFs will follow a disciplined approach to asset allocation. The ETFs will rebalance quarterly back to their target asset allocation weights. Each ETF holds BMO index ETFs that provide exposure to Canadian, U.S. and International equities and bonds.

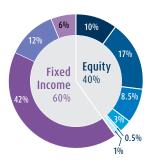

*These units are Fixed Percentage Distribution Units that provide a fixed monthly distribution based on an annual distribution rate of 6%. Distributions may be comprised of net income, net realized capital gains and/or a return of capital.

BMO's Asset Allocation ETFs are an investing solution built to disciplined index weights which aim to provide investors with an ETF that is low-cost, easy to access and simple to use.
